3. If yes, please give a short description of the features of your park and main areas of current work:

Kornati NP is predominately marine area. There are 89 islands, islets and reefs on the area of about 220 km². The land area (islands) cover less than 50 km², and it is completely in private property (owned by inhabitants of the nearby Murter village). Basic phenomena of the park are rich marine biocenosis, beauty of landscape, indented coastline and cliffs on the islands facing the open sea.
